<b>TABLE DF – 4</b>	<b>CREDIT RISK: DISCLOSURES FOR PORTFOLIOS SUBJECT TO THE STANDARDIZED APPROACH</b>
---------------------	---

### STANDARDISED APPROACH

### CREDIT RATING AGENCIES

The Bank is using the ratings assigned by the following domestic external credit rating agencies, approved by the RBI, for risk weighting claims on domestic entities:

• Credit Analysis and Research Limited ('CARE')	• India Ratings and Research Private Limited
• Credit Rating Information Services of India Limited ('CRISIL')	• Brickwork Ratings India Private Limited ('Brickwork')
• ICRA Limited ('ICRA')	• SMERA Ratings Limited ('SMERA')

The Bank is using the ratings assigned by the following international credit rating agencies, approved by the RBI, for risk weighting claims on overseas entities:

- Fitch Ratings
- Moody's
- Standard & Poor's

**TABLE DF – 5****CREDIT RISK MITIGATION: DISCLOSURES FOR STANDARDIZED APPROACHES****POLICIES AND PROCESSES**

The Bank's Policy on Credit Risk Mitigation and Collateral Management include detailed guidelines for risk mitigation and collateral management. The policy covers aspects such as the nature of risk mitigants/collaterals acceptable to the Bank, the documentation and custodial arrangement of the collateral, the valuation approach and periodicity etc.

**RISK MITIGATION FOR COMPUTATION OF CRAR**

For purposes of computation of capital requirement for Credit Risk, the Bank recognizes only those collaterals that are considered as eligible for risk mitigation in the RBI Basel III guidelines on standardized approach, which are as follows:

- Cash deposit with the Bank
- Gold, including bullion and jewelry
- Securities issued by Central and State Governments
- Kisan Vikas Patra and National Savings Certificates
- Life insurance policies with a declared surrender value
- Debt securities rated at least BBB (-)/PR3/P3/F3/A3
- Units of Mutual Funds

The Bank uses the comprehensive approach in capital assessment. In the comprehensive approach, when taking collateral, the Bank calculates the adjusted exposure to a counterparty for capital adequacy purposes by netting off the effects of that collateral. The Bank adjusts the value of any collateral by a haircut, as prescribed by RBI, to take into account possible future fluctuations in the value of the security occasioned by market movements.

For purposes of capital calculation, the Bank recognizes the credit protection i.e. guarantees, given by the following entities, considered eligible as per RBI guidelines:

- Sovereigns i.e. Central and State Governments
- Sovereign entities which includes Export Credit Guarantee Corporation (ECGC), Credit Guarantee Fund Trust for Micro and Small Enterprises (CGTMSE), Credit Guarantee Fund Trust for Low Income Housing (CRGFTLIH) and Credit Guarantee Fund Scheme for Education Loans (CGFSEL).

The credit risk mitigation taken is largely in the form of cash deposit with the Bank and thus the risk (credit and market) concentration of the mitigants is low.

- Interest Rate Risk is the risk where changes in market interest rates might adversely affect a Bank’s financial condition. The immediate impact of changes in interest rates is on Bank’s earnings i.e. Net Interest Income (NII). A long -term impact of changing interest rates is on Bank’s Market Value of Equity (MVE) or Net Worth as the economic value of Bank’s assets, liabilities and off-balance sheet positions get affected due to variation in market interest rates.
  
- The impact on income (Earnings perspective) is measured through use of Traditional Gap analysis, which measures mismatch between rate sensitive liabilities and rate sensitive assets (including off-balance sheet positions) over different time intervals, as at a given date. The impact of interest rate risk on NII is assessed by applying notional rate shock of 100,200 & 300 bps on gaps in various time bucket up to a period of one year as prescribed in Bank’s ALM Policy.
  
- The Bank has adopted Duration Gap Analysis (DGA) to measure interest rate risk in its balance sheet from the economic value perspective. The Bank computes bucket-wise Modified Duration of Rate Sensitive Liabilities and Assets using the suggested common maturity, coupon and yield parameters, prescribed by RBI/BOARD The Modified Duration Gap is computed from weighted average modified duration of total rate sensitive assets and rate sensitive liabilities. The impact of change in interest rate on net worth is analyzed by applying a notional interest rate shock of 100, 200 & 300 bps.
  
- The analysis & reporting of Interest rate risk is done by the Bank on a monthly basis.

<b>TABLE DF – 10</b>	<b>GENERAL DISCLOSURE FOR EXPOSURES RELATED TO COUNTERPARTY CREDIT RISK</b>
----------------------	---

**COUNTERPARTY CREDIT RISK**

- Counterparty Credit risk is the risk that the counterparty to a financial contract will default prior to the expiration of the contract and will not make all the payments required under the contract.
- Exposure to Central counterparties arising from over-the-counter derivative trades, exchange traded derivatives transactions and security financing transactions (SFTs), attracts capital charges applicable to Central Counterparty.
- Applicable risk weights for trades, guaranteed by central counterparties, which are recognized as qualifying central counterparty (QCCP) by Reserve Bank of India or SEBI, are comparatively lower than OTC deals.
- In India, presently there are four QCCPs viz. Clearing Corporation of India (CCIL), National Securities Clearing Corporation Ltd (NSCCL), Indian Clearing Corporation Ltd (ICCL) and MCX-SX Clearing Corporation Ltd (MCX-SXCCL). These QCCPs are subjected, on an ongoing basis, to rules and regulations that are consistent with CPSS-IOSCO Principles for Financial Market Infrastructures.
- The Bank does not recognize bilateral netting. The derivative exposure is calculated using Current Exposure Method (CEM).
